FOR IMMEDIATE RELEASE

MCL Publishes White Paper on a human constraint approach to improving business process modeling.

Paper Outlines an Approach to National Efficiency.

FREDERICKSBURG, VA (November 9, 2007) – MCL & Associates (MCL), a leader in Business Process Improvement (BPR), today announced that it is making available its white paper, "Improving the Business Process Model: A Human Constraint Approach." The paper discusses and adds to current business process modeling approaches. It suggests:

- A greater focus on human dynamic, rather than a mechanical view of business processes.
- Human constraints as the key to turning business process modeling from theoretical elegance to practical.
- Standards of rationality and functionality to align executive vision with process goals, and similarly process goals with process elements and process outputs.

Topics covered in the white paper include:

- Previous Business Process Models
- A Human Constraints Approach
- Executive Vision, Goal(s) And Output(s)
- Triggers, Information, and Resources
- Roles
- Skill Sets
- Tools
- Assumptions
- Constraints
- Metrics
- Entelechy

The white paper can be downloaded – please visit:
